

Notes from visit with Garth Davis, Spokane County Conservation District Arborist. 7-6-22

Garth met with Gary and I this afternoon to look at the trees at each of the lots in the HOA. This was the result of a request to determine what can be done to enhance the health of the trees as well as give us advice on the best types of trees to replace any trees that must be removed.

LOT#	Type of trees	Notes	Lot	Type of Tree	Notes
95	Green Ash	aphids and trip	141	Mountain Ash	Diseased Remove
97	No trees		143	Flowering Cherry	OK

96	Green Ash	Trim
94	Maple	OK Mugo Pine OK

The Spruce trees have spreading roots but are so far not a problem, Do not trim them but every 5 or so years.

Prune means removing large branches to shape tree.

Trim means removing limbs that obstruct walking or too close to vehicles or sitting areas,
